# Laminex® Edging

Laminex provide matching edging for a wide range of décors and products. Laminex ABS Edging is an impact resistant, thermally resilient edging option. A light-fast and durable edging, it is resistant to common household cleaning agents, and is food grade, making it suitable around food preparation areas and for use in hospitals. Ideal for use as a matching or contrasting edge finish for furniture, cupboard doors and drawers and shopfittings, where a high impact aesthetically appealing edge is required.

Acrylic Edging is also available for selected décors, as it provides a special three-dimensional effect, achieved by applying the decorative finish to the back of the clear edging. This results in a seamless transition between the edging and the decorative surface, particularly for gloss surfaces. It is also fully protected against abrasion or damage, as the surface can be polished and buffed up if required. Laminex Acrylic Edging is impact resistant, hygienic and resistant to normal room humidity levels.
