Acrylic Edging	Page 17

Explanations

Redback® is Postforming High Pressure Laminate (HPL).

*PLEASE NOTE that Nuance and Chalk finish HPL have different performance characteristics to standard Redback. Refer to the technical data sheet at laminex.com.au

Lamiwood® is Moisture Resistant (MR) E0 MDF decorated board

Silk Finish™ is MR E0 MDF decorated board with a medium gloss finish

Decorwood® is Standard E0 MDF decorated board

Vertiboard® is MR E0 particleboard decorated board

Structural MR® is MR E0 MDF decorated board with an enhanced impact resistant surface

Where 'or' is shown in chart this means that either thickness is available dependent on local demand. Check with your nearest branch for specific availability. For example: Lamiwood 16mm or 18mm means that either 16mm or 18mm is available, dependent on local demand. Check with your nearest branch for thickness availability in your area.

Edging is available in selected finishes and decors. For full detail refer to the Edging pages.

Dark colours and gloss finishes are not recommended for high wear applications such as busy kitchen benchtops. These colours or finishes will show scratching more readily than lighter colours or lower gloss surfaces and require a higher level of care and maintenance.

For full technical information, please refer to the Technical Data Sheets (TDS) at laminex.com.au
